Porsche 996 Turbo

2002

Highlights

- low mileage
- traceable history
- Original vehicle documentation folder containing all operating manuals and the original, stamped cheque book
- comprehensive invoicing records covering all optimisations
- GT2 front and rear spoilers (genuine Porsche)
- FVD power boost to 542 PS
- various upgrades such as Techart wheels, KW3 coilover suspension, etc.
- extensive optional extras (Porsche Exclusive X-Codes)
- Manual gearbox

Before any of you, having looked at the pictures, are tempted to point out that this must surely be a 996 GT2 – that's not the case. This is in fact a very well-equipped 996 Turbo built in 2002. The 'GT2' lettering on the rear is simply the result of fitting the original Porsche GT2 rear and front spoilers (genuine Porsche parts). But more on that later.

The vehicle was delivered in July 2002 (country code C11) to Zagreb, Croatia. There, the vehicle was always serviced by its owner at either the Porsche Centre Velika Gorica or the Porsche Centre Zagreb. The service history book is, of course, available, complete with the original on-board folder and all manuals, and confirms the verifiable mileage, which currently stands at approximately 83,000 km.

Over the years, a wide range of upgrades have been carried out on the car – all modifications are documented by invoices and records. In addition to the aforementioned GT2 front and rear spoilers, the most significant modification is the FVD performance upgrade from the standard 420 PS to the now registered, staggering 542 PS, which was installed as early as 2009. The car has therefore already spent the majority of its life with this power upgrade without any issues. In addition, the Turbo was fitted with a KW3 coilover suspension and Techart wheels, which are also registered in the German vehicle documents.

Incidentally, the Turbo arrived in Germany in 2016 – over 10 years ago now – and has since been driven exclusively in the Stuttgart area; it is currently with its third German owner. The service history has been consistently maintained at specialist Porsche garages over the years. All TÜV reports and service records are compiled in a comprehensive folder.

Overall, the vehicle is in a very fine and well-maintained condition. Despite the modifications already mentioned, this Turbo is by no means a 'tinkered-with' car. Everything on the car has been optimised with care and good judgement. The Turbo also retains its original paintwork in its entirety, so there are no signs of accident damage or any other improper handling. The car also features the more sought-after manual

gearbox. Furthermore, the 996 is superbly equipped with a wide range of factory-fitted special options from Porsche Exclusive Manufaktur (X-codes):

XSC Porsche crest embossed on the headrests
XKE Side air vents (outlets) painted in Arctic Silver
XKW Centre air vents / vent surrounds finished in Arctic Silver
XKX Instrument cluster surround finished in Arctic Silver
XNY Trim strip on the dashboard finished in Arctic Silver
XTF Door panel sections in Arctic Silver and leather
XJ4 Ignition lock rosette trimmed with leather
XV1 Defroster vent (windscreen air outlet) trimmed with leather
XX1 Floor mats with leather edging and embroidered Porsche logo
X46 Wheel centre caps and wheel hub covers in exterior colour
X97 Gear lever knob (manual gearbox) in aluminium / leather
X98 Handbrake lever in aluminium / leather
X54 Stainless steel tailpipes (chrome-plated, oval design)

In this configuration, the vehicle is certainly a one-off that simply has to be seen and experienced. We therefore warmly invite you to view the vehicle in our showroom, subject to prior appointment. We look forward to hearing from you and welcoming you!

The vehicle is being offered on behalf of a client. Errors and prior sale reserved.
